

Having disclosed the invention what is claimed for Letters Patent is:

1. An employee accounting device comprising:
  - a) an automatic teller machine;
  - b) a time recording device coupled to the automatic teller machine;
  - c) a computer network processor for interfacing the automatic teller machine with an employer's time-keeping and payroll accounts, a banking institution, an employer's account and an employee's account.
2. The employee accounting device according to claim 1, wherein an employee's bank records and employment accounting records are accessible through the computer network processor.
3. The employee accounting device according to claim 1, wherein the computer network processor can be accessed by a magnetic identification card having a unique personal identifier.
4. The employee accounting device according to claim 1, further comprising a slot formed on the device into which an employee can insert a personal identification card unique to said employee to check-in and check-out of a work site.
5. The employee accounting device according to claim 1, wherein the device calculates the employee's hours worked.
6. The employee accounting device according to claim 1,

wherein the computer network processor includes employer pre-programmed salary and tax information for each employee.

7. The employee accounting device according to claim 1, wherein an employer can authorize automatic disbursements from the employer's account to the employee's account based upon the employer pre-programmed salary and tax information.

8. The employee accounting device according to claim 1, wherein an employee can make cash withdrawals of wages earned from an employee's account attributable to said employee.

9. The employee accounting device of claim 1, further comprising a keypad for allowing an employee to enter data.

10. The employee accounting device of claim 9, wherein the data includes an employee unique personal identifier.

11. The employee accounting device of claim 1, further comprising a menu for allowing an employee to choose from a plurality of banking options or a multitude of employment time-keeping options.

12. The employee accounting device of claim 1, wherein the computer network processor compiles a summary of an employee's hours worked for subsequent employer review.

13. The employee accounting device of claim 1, wherein the computer network processor interfaces the time recording device with an employer's pre-programmed salary and tax information thereby calculating an amount for a payment for time worked for

the employee.

14. The employee accounting device of claim 1, wherein the computer network processor allows the employer to review and authorize proposed payments to the employee before any funds are transferred.

15. The employee accounting device of claim 1, wherein the device is installed at an employer work site and includes security features to prevent tampering.
